

## TRANSCRIPT

### 1. Midfi prototype user test

Tra Pham 0:00

Okay, so my name is Tra. I'm currently doing the user testing for my myth validity website. I would just like ask you to look through all of it and then give me some feedback and some of your thinking about my website, anything that confused or like frustrating, anything that did good, yeah,

Victoria Zhou 0:26

yeah. Okay, no worries.

Looking at the home page,

I believe, or the landing page, and there's a hero section, and I really like it, because I think it's spaced out very nicely. And I like that there's the navigation elements in the top and the logo and the search bar. I also like that there's a gallery section, because then I can look at pictures. I don't think there's anything wrong with this. So I'm going to move on

to the About Us section, is this an image? Yeah, it's

Tra Pham 1:04

supposed to be the image. Okay,

Victoria Zhou 1:06

so I'm a little confused by the location contact in our story section. It looks a bit like a file, like a filing cabinet thing, and it looks like I can drag it out, or something like that. But,

Tra Pham 1:20

yeah, it's supposed like this dark layout, but, ah, yeah, so

Victoria Zhou 1:23

is it like odds?

Tra Pham 1:27

Um, yeah. It's supposed to like, you click on it and it will float over. But maybe that's very

Victoria Zhou 1:38

Yeah, yeah, but that's a very nice design. I like it. I think these elements are all integrated very well. But I think the image can be I think the image might be a bit jarring if it doesn't have like a gradient effect or something like that on the side, yeah, but it can be married together very well if you do like a gradient or something like that. Okay, so I'm moving to the Explore page, and there are plants and species and features. I really like that you have a plant and species page for your garden,

and the features orange Coronavirus.

I'm a little confused by the features. So like, are

they like other areas? And, yeah,

Tra Pham 2:26

it's kind of like other areas

Victoria Zhou 2:39

in the garden, or is it like other areas?

Tra Pham 2:42

Yeah, like the area in the garden. Oh, okay, they have,

Victoria Zhou 2:46

yeah,

yeah. So I think, oh so you just wrote other areas as like, placeholder text, right? Yeah, yeah. Okay. No worries. I like this design as well. I think this is also looking like cards to me, and then they're cut off at the bottom. So this might be a little different for me, because I usually expect to be fully in the screen, but that's okay, yeah,

I'm now moving to,

I believe the Activities page. Yeah, I like that you have a start to show that this is, like, the best walking trail or best thing to do and events. Um, yeah, I think this page is very intuitive. Um, there's a scroll.

Yeah, it'll scroll, like two images at a time. I believe is there going to be a scroll back body? Maybe, maybe

Tra Pham 3:53

the features of the like, the activity things in this location, is not that much, so maybe I would just get rid of it, yeah, okay,

Victoria Zhou 4:01

yeah, that can be fine. Yeah.

I think the spacing could be do, could do with a little work. So, like, it's looking a very busy right now. So the like, the activities and events, they're very tight together. But otherwise, so you can just work on the spacing here, and that'll be fine. Plan your visit. I really like how, like, you laid this out, like the hierarchy is very obvious, so the map and guide is very important, and then there's the accessibility considerations, and then the weather. Yeah, do

okay, I'm gonna move on to the mobile, if that's okay, yeah, yeah.

Tra Pham 4:55

You can start from the last eight. Yeah, this one,

Victoria Zhou 4:59

okay, and then it goes this way, yeah, like, yeah. If

Tra Pham 5:04

you click on the menu, it will have to drop down

Victoria Zhou 5:07

like that. Okay, yeah, yeah. For the menu, I think you should put it on the right side, because usually people are right handed and their thumb is on the right side, so to like, navigate to those places they usually might want to click on the right side instead of the it's a bit of a trick, but yeah, okay. What else? Instead of a search bar on the phone, I think you could make a footer as well, because, yeah, the search bar will like, expand into this might be hard for the user to like, actually use that. Okay, yeah, so a footer might be nice for navigation as well, but I'm not sure how to integrate that in a mobile but that's for you to think about, I

Tra Pham 6:03

guess. Yeah.

Victoria Zhou 6:13

Oh yeah.

I think this isn't an issue with your phone one, but some titles on each page layout are quite inconsistent, so some are like vertical and some are horizontal. That's definitely something you could work on, but I think it's not too bad. But yeah, okay, thank you. Okay, yeah. And then for their phone, I think you've integrated. You've made it very responsive. Looking,

I can see that you've got cards here. It's like a

been minimized.

So these look a bit narrow to me. In the activity section, these

cards are like a bit narrow.

Tra Pham 7:01

Okay, maybe I should make only one for each row.

Victoria Zhou 7:04

Yeah, you could Yeah, and that would be spaced better, yeah.

But everything else looks good to me.

Okay, yep, yeah, I

Tra Pham 7:16

think that's yeah. You are done like. I think that's all for my flexibility. one. Okay,

Victoria Zhou 7:25

do you move on to high point now,

I'm not high five sorry, yeah.

Tra Pham 7:31

Wait a minute, let me stop the recording for.

## **2. Website testing**

### **First person:**

Tra Pham 0:02

let me read the quick script first. Okay, so hello. My name is Jane. I'm going to walk you through a testing section today. So as you go, like using the website, I would like you to sing aloud as much as possible. So like describe what you are looking for, what you're trying to do, and like, What's your thinking about the website? So to start, please look at the page and tell me, like, what are your first impressions? And like, what do you think this site before?

Victoria Zhou 0:35

Okay, I think the site is very clean looking. I like at

Tra Pham 0:40

the first page, first page, yeah.

Victoria Zhou 0:44

Oh, okay, yeah, okay, okay, so I thought there would be a home page, like navigation tab thing, but, yeah, I can see, oh, it's very nice. I like it. Okay. I like the contrast between the typography and the image behind it. I also like the gallery how it's scrolling on it on its own. I like that you included contact us, quick links and more information. And the footer looks very well integrated. I Right? Yeah. I think this is a very effective homepage, but it would be a bit confusing to go to. So

Tra Pham 1:32

like, you're not sure if it's a link to look at to click on, right,

Victoria Zhou 1:36

yeah. But also, like, when you first start with the website. It's usually on the home page, so I guess people would figure it out. Yeah, okay, yeah, but that's fine. Okay, I'm gonna move on to the about us page now. So first I'm looking at the cards and looking at the footer as well. The footer is the same the cards, I believe I feel like with the header, so like the title, the cards being not centered. I mean, they are centered, but like not with the title, looks a bit different. Looks a little odd. Okay, okay, it's a little it's not a big issue, yeah? I'm gonna move on to explore. So these cards are really beautiful as well. I feel like there could be some more spacing between the titles and the body body text. You could maybe. Oh, actually, no, not. Not a good idea. Never mind. Can I click this? Oh, yeah, okay, yeah,

Tra Pham 2:50

so maybe make that link like noticeable, so that you can show yeah, click on it, yeah, yeah.  
I

Victoria Zhou 2:57

think that would be really good. So the link could be more noticeable. But this is also very clean. Activities. Cards look very well integrated as well. I like that you can hover and look at the text. Um. Text is a bit so it's like, justified, not justified. It's center aligned, right? Yeah.

So I think you could make it left alone, because it's a bit hard to read, right? But that's it's up to you, yeah. And then, so these two look really good, but these two are a bit hard to read.

Tra Pham 3:38

Oh, okay, okay, just the image choice.

Victoria Zhou 3:43

Oh, no, it's not the images problem, it's the text. So,

Tra Pham 3:47

like, how is a lie? Like, you prefer, like the text the left

Victoria Zhou 3:51

align, but it's really up to you. All right, yeah, um, for the plan. Oh, I really like this map. Did you make it yourself

Tra Pham 4:01

and those, of course, yeah,

Victoria Zhou 4:05

I think the color scheme really works. So, like the color used in the background, it really works with the map. So it makes it look like it's part of the website, okay? It makes it look like you made it yourself. And then the ability section is very important. I think it's good that you included it. And quick links about our six pro activity through our brochure. Let me click that. Oh, no. Oh, wow, so there's a brochure, and the Contact Us? Yeah, I think everything's working fine. It's just I got a little confused about how to go to the home page, but I don't think that would be an issue if, like, people start from the home page. Okay, scrolling is a little slow. Like,

Tra Pham 4:56

yeah, let's show how to fix that, yeah, to add the description text there. So like, people will be patient a little bit. Yeah,

Victoria Zhou 5:05

you can do that. Yeah, okay, yeah, this is a very nice microphone. So like,

Tra Pham 5:11

for the like, only confusion is that you're not sure. Like, you can come back to the homepage when looking at the logo, right,

Victoria Zhou 5:19

yeah. And also the gallery, like, I feel like some people have really short attention spans. Soon, if they see them do, they might Yeah, like, yeah, you could try and make the gallery speed faster, okay, or, like, for the blank area, make it like less, all right, yeah. But yeah, really nice micro side,

Tra Pham 5:46

yes. So I think that's actually all, really.

Victoria Zhou 5:50

Do you have any questions?

Tra Pham 5:51

Question more like, I'm just asking you about like, the confusion things. Okay, so if you had any like, suggestion, it would be good. But, oh, also, my target audience is, are the photographers and, like, parents with Yeah, and the parents with kids or something like that. So do you think this website is work for them? Like they have all the information that

those people might need about, like, finding a beautiful place to do the natural photo shoot, and, like, the place for family outing?

Victoria Zhou 6:27

Yeah, I definitely think so, because you have the gallery that showcases all these beautiful images. And like, people will definitely see that this is a great place for photo shoots. Have like activities so people see, you can book events here too, which is really good, yeah, and the plan, like, it makes it really easy for people to get here and find their way around. So I think it's, I think your purpose is quite clear. Okay,

Tra Pham 6:57

yeah, I think that's all. Okay.

Victoria Zhou 7:01

## **Second person:**

Unknown Speaker 0:04

Okay,

Speaker 1 0:15

hi, my name is John. I'm currently doing the user testing and today, I'm going to ask you to use my website and your feedback is valuable and help me to determine if my website if function as intended. So I would like you to think aloud as possible, to describe what you are looking at and what you are trying to do. To start, please look at this page and tell me, like, like, what are, what are your first impressions, and what do you think the size for?

Unknown Speaker 0:46

Oh, so the first

Speaker 2 0:59

the color palette is really nice. Um, it's like remind Yeah, remind me of the actual garden with like the green color. And then I also like the carousel. You make it scrolling, and to show like the beauty of the garden. Um, I can say in the footer, I can actually click on some, some link, because it respond back for me. Because when I hover in it have, like, a why thing is, let me know that always clickable. Yeah, so it's really good.

Speaker 1 1:41

Yeah. All right. Um, okay. And now for your like, come to Yeah, just kind of explore every page.

Speaker 2 1:49

So I really like how your nav bar have, like, changing color when I hover into,

Speaker 2 2:02

Oh, um. So about us, um,

Speaker 2 2:12

I like how you would like put, like the image and also, um, the word besides order. So that is helped me really easy to like, understand the context. It will be great if you can highlight, like, make it some word like, become bold, so that I can like, focus more on it. So, because it took me quite long to like, actually read all that. But would be great if I can, like, know exactly, like, over 60 years, or also something that really important. Okay, next one is I click on to the Explore page and um,

Speaker 2 3:05

I sure was Explore page corner two. But I think

Speaker 1 3:12

inside the features of the garden, like, what they have inside, so yeah,

Speaker 2 3:19

I see, yeah, it's really good, like, oh, and then more. And then I click on

Unknown Speaker 3:27

I see like. You put like

Speaker 2 3:30

into the column, and so I read it from left to right. And then for the last column, say, explore all area from and then I click on the More images, and it's led me to the actual gallery of like, the photo actually nice. Um, yeah, I really like, I really like the color palette. It's really good. Okay. Oh, so I click on the activities on the Napa, and then when I hover in, it's actually change. Is actually showing me the information? Yeah,

Unknown Speaker 4:15

I wonder if I can click on it. No.

Speaker 1 4:20

Is it changing the color? No, okay,

Speaker 2 4:24

no, but yeah, it's really good, like the cover effect, okay. And then lastly, I click on plan.

Unknown Speaker 4:35

Is it? Is it a photo?

Unknown Speaker 4:37

It's a photo. Yeah.

Speaker 2 4:40

So plan your trip is, like the map of the garden and, oh, I really like how you have, like, accessibility considerations, like parking lot and something else helped me, like, easy to

Unknown Speaker 4:59

know with, like the garden the discard,

Unknown Speaker 5:16

Yeah, oh yeah,

Unknown Speaker 5:19

you actually have a guide for

Unknown Speaker 5:24

yes, okay,

Speaker 1 5:28

do you have anything that you find, like frustrating or confusing when using the website?

Speaker 2 5:35

Maybe confusing gotta be the Explore page you can like, I don't know what I'm gonna explore. So

Speaker 1 5:44

maybe it was like, the features is gonna be more clear. It's gonna be clear

Speaker 2 5:50

not the feature is fine. We have, like, a, maybe just a small sentence, like, like, showing, like, oh, you can explore what, like what we have, or something like that. No, so the garden have camel, yes.

Unknown Speaker 6:18

Frustration, maybe, no,

Speaker 2 6:23

um, I can say it respond bad, yeah, which is really nice. Oh, yeah, I like how the footer also change into column.

Speaker 1 6:45

Yeah, that's all right.

Unknown Speaker 6:52

All right. Thank you for your feedback. Okay,

Speaker 1 7:00

okay, you get Yeah. It navigation,

Speaker 2 7:06

M

Unknown Speaker 7:19

to

Speaker 2 7:22

same time also M, building, how much lamb side,

Unknown Speaker 7:30

Not

Speaker 2 7:33

bio? Can I know How

Unknown Speaker 7:41

long so you

Unknown Speaker 7:54

hog,

Unknown Speaker 8:29

homework.

Unknown Speaker 8:30

Okay,

Speaker 1 8:37

did you join

Unknown Speaker 8:43

I mean, yeah, you come like, Look

Unknown Speaker 8:45

my you go, hey, yeah,

Speaker 2 8:46

let me look my money anywhere. Look my time for committee. Yeah, I can come. You what time? Oh,

Unknown Speaker 9:08

yay,

Unknown Speaker 9:22

yay,

Unknown Speaker 9:25

thank you. Okay, okay,

Transcribed by <https://otter.ai>

### **Third person:**

So hello. My name is Tra, and I'm currently doing the user testing for my website. Your youth, your feedback is valuable and will help me to determine if my website function as intended. And during this section, I will asking you a few general questions. Later on, we will look at some early Okay, and as you go using the website, I would like you to think aloud as much as possible. So describe everything you think. Are you trying to do? So that's a will

be a big help. Okay? So to start, please look at the page and tell me what you make of it like, what are the first impression and what do you think of the size for

Speaker 2 3:03

I will get at the homepage right now. I feel like, for the fun, like, this one is a bit still hard to see, Okay, this one like the one the nature said in gem, we're trying to create the blooms. But this one is a bit like, Oh, okay. I you.

Unknown Speaker 3:28

Oh, it doesn't but

Speaker 2 3:30

okay, so it's like a gallery that never stops, yeah, okay, which is a cute idea. I feel like I see the contact us quickly. How much about sex for activities plan, if you I really like the footer, okay. And also, let me go to the Do I just go? Yeah,

Unknown Speaker 3:56

okay, so,

Speaker 1 3:59

okay, maybe just not really a scenario, but kind of imagine, like you are a parent and you want to find, like a nature place to take your children there at the weekend to do some family outings such as Big Nick or hiking. Yeah, you can just explore the website as you want.

Speaker 2 4:19

Okay, I'm gonna bring my child here. Okay,

Unknown Speaker 4:26

I'll look at the about us now.

Speaker 2 4:30

It's real. Oh, it's really with the padding is nice. I like the this one, the history or an introduction, but I don't know. Maybe it will be better if it's left aligned, or maybe, I'm not sure, I haven't see if it's left aligned or not. Would it be better? Okay, but I really like this one. How is like just there?

Unknown Speaker 4:57

Also like, for that,

Speaker 2 4:58

let me go to the Explore NOW, like, I feel like, this very straightforward. It's like, there,

Unknown Speaker 5:03

yeah, whatever. It has, always there,

Speaker 2 5:09

always there, okay. And then I see, oh, we can I press more image? Oh, I can see more image for, like, the gallery. This probably where

Unknown Speaker 5:21

you took it. Yeah, it's kind

Speaker 2 5:30

of Ooh. I feel like maybe there should be something else. I feel like this quite hidden, though it's very hidden,

Unknown Speaker 5:38

so it's not really visible as a link, yeah,

Speaker 2 5:41

for the other areas, for this one, it's not really visible, okay? And I feel like, why is this so far apart?

Unknown Speaker 5:53

Explore industry,

Unknown Speaker 5:56

okay, okay,

Unknown Speaker 5:58

so now I'll go to the Activities page,

Unknown Speaker 6:01

wow, you copy

Unknown Speaker 6:06

better example.

Unknown Speaker 6:09

It's helpful. Hi, yeah,

Unknown Speaker 6:14

you actually can. Oh, yeah, just, can

Unknown Speaker 6:16

I even dress No, cannot

Speaker 1 6:20

you? When you Oh, you can. Then this one can,

Unknown Speaker 6:32

I don't think it's visible.

Unknown Speaker 6:33

Really, try, try

Unknown Speaker 6:35

the lift. This girl garden.

Unknown Speaker 6:37

Oh, yeah, it can,

Unknown Speaker 6:40

you can it's just not visible.

Speaker 1 6:43

It's not really visible. Maybe I should make it like different color when you hover in or something like that. Yeah, yeah. Okay,

Speaker 2 6:57

so it's really straightforward. Activities, event

Unknown Speaker 7:01

What are you trying to track again?

Speaker 1 7:06

Who are the target market? Yeah, like the parents with child. We're looking for the place, outdoor place, and like the photographers.

Unknown Speaker 7:18

Okay, so there's the activities.

Unknown Speaker 7:22

It's the same. There's nothing else,

Unknown Speaker 7:24

actually, that's it.

Unknown Speaker 7:27

Why you copy everything?

Unknown Speaker 7:31

It's not even Google Map. But you mean copy,

Unknown Speaker 7:33

you copy this thing, my Hover thing,

Unknown Speaker 7:36

hi, yeah, not

Unknown Speaker 7:39

really. I can hear it.

Unknown Speaker 7:44

Well, I feel like Google Map is better

Speaker 1 7:48

because I feel like you already had a location and like this map is really good for people who don't know what else to do in the like, for example, like parents or something like that, they have like the game to find just for me. But okay, I get you. I

Speaker 2 8:07

That's very straightforward. Let us give you an overview of liscard garden so you won't get lost.

Unknown Speaker 8:17

Say, Oh, you're probably gonna get lost.

Unknown Speaker 8:19

Can be

Unknown Speaker 8:23

okay, isn't that it?

Unknown Speaker 8:26

Yeah, that's it okay.

Unknown Speaker 8:34

There's nothing inside the responsive one. Oh,

Speaker 2 8:41

wait, it's sometimes like it has to play

Speaker 1 8:48

a role. What did you do? That's the problem.

Unknown Speaker 8:55

My navigation bar

Unknown Speaker 8:57

is a it's just there, even though,

Unknown Speaker 9:02

funny, wait, no, it can,

Speaker 1 9:11

actually, you press on, what happened to this? I know what the is that? What did you do?  
Oh, oh, come down mine. Mine was not the

Speaker 1 9:40

Indian guy, you said, and you don't follow properly.

Unknown Speaker 9:46

You don't follow it properly.

Speaker 1 9:58

On the on the, on your right side, yeah, like, like, the device option, the button on the right which one? No, no, no, no. Like on the Inspect page, yeah, yeah, try to click on the device again. Then the laptop in the phone, things up here, no, yeah, that's one. Okay, now try with this.

Unknown Speaker 10:29

Try, try with the, yeah, that's one.

Speaker 1 10:32

Don't throw anything. It's

Speaker 1 10:47

I thought, alive, no, because the problem, which one, which one this one? Why is it more

Unknown Speaker 10:55

information, like

Speaker 1 10:56

no center, but for the Contact Us? Because I feel like if it before, it was center, and it's kind of hard to read, so I put it in, like,

Speaker 2 11:06

I feel like for the footer, there should be something. I feel like the padding should be fixed, like the spacing,

Speaker 1 11:12

okay, okay. But still, what happened to this?

Unknown Speaker 11:17

I think you could say that in the justified thing.

Speaker 1 11:20

Yeah, I will try. I will check again. Like, what happened?

Unknown Speaker 11:25

And this one also tra

Unknown Speaker 11:29

everywhere. But, like, if

Speaker 1 11:30

you don't really scroll to the side, it's, it's fine for for the other part,

Unknown Speaker 11:36

the phone is too small for the phone.

Unknown Speaker 11:40

The phone, yeah, it's so tiny.

Unknown Speaker 11:54

16 minus 12 voice, it's huge,

Unknown Speaker 11:58

really, yeah,

Unknown Speaker 11:59

nice scene. You

Unknown Speaker 12:00

picked the wrong phone.

Unknown Speaker 12:05

Look at this blueberry.

Unknown Speaker 12:06

Can see

Unknown Speaker 12:09

that's so small. Okay, look,

Unknown Speaker 12:11

hey, what's this? Tra,

Unknown Speaker 12:13

okay, okay, which one?

Unknown Speaker 12:18

What's that button?

Unknown Speaker 12:19

Yeah, that's what I'm learning is from you,

Unknown Speaker 12:21

where's the red come from?

Unknown Speaker 12:24

I don't even have that on my laptop. Are you sure

Unknown Speaker 12:31

I don't even make that whatever.

Unknown Speaker 12:42

And also this

Unknown Speaker 12:45

menu is one move. It won't move. No, no,

Speaker 1 12:54

what, what the heck? Why you keep scrolling to that side? Not working.

Unknown Speaker 13:03

It's not working. Okay, okay, maybe

Speaker 1 13:06

that page, I haven't put the script on it. Hi, bad example. Okay, ah, anyway, I think that's

Unknown Speaker 13:18

for my user testing.

Speaker 1 13:20

There's no post interview. Oh, sorry, I forgot I remind me. Okay, um, so just a quick, few quick questions. So what do you think is the like most frustrating part in the website, the maneuver, the menu, like, the responsive thing, right? But like, when

Speaker 2 13:45

it's become like a phone, yeah, when it's turned as a phone, it's like,

Speaker 1 13:56

it's like, somewhere, yeah, it's not on the phone, okay? Yeah, that's the problem

Unknown Speaker 14:03

of the menu bar.

Unknown Speaker 14:07

Beside that, anything you find

Unknown Speaker 14:10

the font size.

Unknown Speaker 14:12

The font size for the font is

Speaker 1 14:13

so tiny, okay, like for all things are just like the Explore, the activities, thing

Speaker 2 14:22

for like, mostly all of them,

Unknown Speaker 14:28

like this one,

Unknown Speaker 14:29

the one where you hover is not working.

Unknown Speaker 14:32

That's one, I get it.

Unknown Speaker 14:38

But the others is, okay, do

Speaker 1 14:46

big try chain into the laptop, then don't check with the phone. I get the

Speaker 1 15:03

Okay, um, so do you have any recommendation or things that you might want to ask? Want to ask? Not

Speaker 2 15:13

really. I feel like it's good so far.

Speaker 1 15:18

Okay, so you find all the information you need there, right, yeah, but

Speaker 2 15:21

I feel like the gallery, why? I feel like there could be more, more image, not more information.

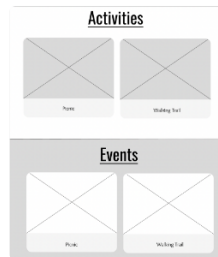

Speaker 1 15:30

Oh, my intention was just like the image galleries, and that's it. So that's why, yeah, okay. I think that's all. Thank you for your insights.

## **CHATGPT PROMPT**

- I acknowledged using ChatGPT for the tutorial code on how to make the Activities page layout (overlay text when hovering on image) with this given prompt:

now with that text over image when hover, can you combine with this layout?

To achieve a layout like this, where you have a hover effect with text overlay on each image, I'll walk you through the HTML and CSS code structure. This solution includes a section for each category ( `Activities` and `Events` ) with two cards each, using a hover effect that reveals text on the images.

Here's the code:

#### HTML

```
html
Copy code

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Activities and Events</title>
  <link rel="stylesheet" href="styles.css">
</head>
<body>

  <div class="section">
    <h2>Activities</h2>
    <div class="card-container">
      <div class="card">
        <div class="card-image">
          
          <div class="overlay">
            <div class="overlay-text">Picnic</div>
          </div>
        </div>
        <div class="card-caption">Picnic</div>
      </div>
      <div class="card">
        <div class="card-image">
          
        </div>
        <div class="card-caption">Walking Trail</div>
      </div>
    </div>
  </div>

  <div class="section">
    <h2>Events</h2>
    <div class="card-container">
      <div class="card">
        <div class="card-image">
          
          <div class="overlay">
            <div class="overlay-text">Picnic</div>
          </div>
        </div>
        <div class="card-caption">Picnic</div>
      </div>
      <div class="card">
        <div class="card-image">
          
        </div>
        <div class="card-caption">Walking Trail</div>
      </div>
    </div>
  </div>
</body>
```

Message HTML + CSS + Javascript

```

</div></div>
<div class="card-container">
  <div class="card">
    <div class="card-image">
      
      <div class="overlay">
        <div class="overlay-text">What's On</div>
      </div>
    </div>
    <div class="card-caption">What's On</div>
  </div>
  <div class="card">
    <div class="card-image">
      
      <div class="overlay">
        <div class="overLay-text">Booking Event</div>
      </div>
    </div>
    <div class="card-caption">Booking Event</div>
  </div>
</div>
</div>
</body>
</html>

```

Copy code

## CSS

```

css
/* General styling */
body {
  font-family: Arial, sans-serif;
  background-color: #f4f4f4;
  margin: 0;
  padding: 20px;
  display: flex;
  flex-direction: column;
  align-items: center;
}

.section {
  width: 90%;
  max-width: 1200px;
  margin-bottom: 40px;
}

.section h2 {
  font-size: 2em;
  text-align: left;
  text-transform: uppercase;
  font-weight: bold;
  text-decoration: underline;
  margin: 0 0 20px 10px;
}

/* Card container for grid layout */
.card-container {
  display: flex;
  justify-content: space-between;

```

Copy code

```

.card-caption {
  padding: 15px;
  font-size: 1.1em;
  text-align: center;
}

/* Overlay for hover effect */
.overlay {
  position: absolute;
  top: 0;
  left: 0;
  width: 100%;
  height: 100%;
  background-color: rgba(0, 0, 0, 0.5);
  display: flex;
  align-items: center;
  justify-content: center;
  opacity: 0;
  transition: opacity 0.3s ease;
}

.overlay-text {
  color: white;
  font-size: 1.5em;
  font-weight: bold;
}

.card:hover .overlay {
  opacity: 1;
}

/* Responsive styling */
@media (max-width: 768px) {
  .card-container {
    flex-direction: column;
    gap: 20px;
  }

  .card {
    width: 100%; /* Stack cards vertically */
  }
}

```

#### Explanation

- **HTML Structure:** Each `section` contains a title and a `card-container` with two `card` elements, each having an image and a caption.
- **Overlay:** Inside each `card-image`, an `overlay` div is used to display text when hovering. The overlay initially has `opacity: 0` and becomes visible on hover.
- **Responsive Layout:** Using media queries, we make the cards stack vertically on smaller screens (less than 768px wide).

This setup will provide the layout you want with a hover effect overlay text. You can adjust the styles (like colors and fonts) to match your design exactly. Let me know if you need further customization!

- Overall, its provided code has helped me to create the base layout for my “Activities” page.
- However, I had to further modified the code to be suitable for my website, including styling elements, fixing responsive problem and error layout when I add my content’s text. (image below)

## **ACTIVITIES**

 Picnic

Lisgar Gardens offers a beautiful escape into nature with plenty to explore and enjoy.

It has a beautiful open-grassed space surrounded by flowers in bloom, which is a perfect place for a picnic.

Group Outing

 Walking Trail

**Walking Trail**

Walking Trail

## **EVENTS**
